Snap-In mounting (Keystone module with mounting)

The Delock Keystone system is a modular connector system.

It can be used for many custom applications and is very versatile. There are currently more than 70 modules available - a diversity, which can solve any connection task quickly and easily. For installation in server cabinets and racks there are 10″ and 19″ patch panel. Keystone brackets for DIN rail can be used for multimedia distribution at home or e.g. be installed in control cabinets.

Useful tool for connecting module and cable

Connect a network cable quickly and easily to the RJ45 Keystone module 86205 or 86179. The single wires need to be pre-assembled in the module, then the module is inserted in the tool and pressed. Thereby all the wires are simultaneously contacted and the excess cable ends are cut off.
